

Fabrication Management Software

Control execution. Deliver with confidence.

Fabritec helps manufacturers plan, execute, and control production in one real-time system

www.fabritec-eg.com

The plan is clear. Until execution starts.

Production plans change daily. But when planning depends on Excel, paper, WhatsApp, and disconnected tools, visibility disappears.

Disconnected Tools

Disconnected systems
Excel / Paper
WhatsApp

No Live Visibility

What is planned?
What is delayed?
What is at risk?

Weak Accountability

Who owns the delay?
Where is bottleneck?
What happens next?

Fabritec turns planning into live execution control.

Shipping

Installation

Plan clearly

Execute in
real time

Control
every stage

Act earlier

One platform to plan, execute, and control the full workflow.

Fabritec gives every team a live view of plans, resources, production, quality, shipping, installation, risks, and progress.

Engineering & Data

- Engineering Management
- Revisions Management
- Document Management
- 3D Viewers
- BIM/CAD Software Integrations

Planning & Resources

- Production Planning
- Production Scheduling
- Project Scheduling
- Resources & Shift Management
- Workstations & Labour Control

Execution & Operations

- Live Production Tracking
- Factory Execution Control
- Project Management
- Quality Control
- Shipping Management
- Installation / Erection Management

Visibility & Intelligence

- Live Dashboards
- Reports
- AI Insights
- Live Notifications
- Alerts

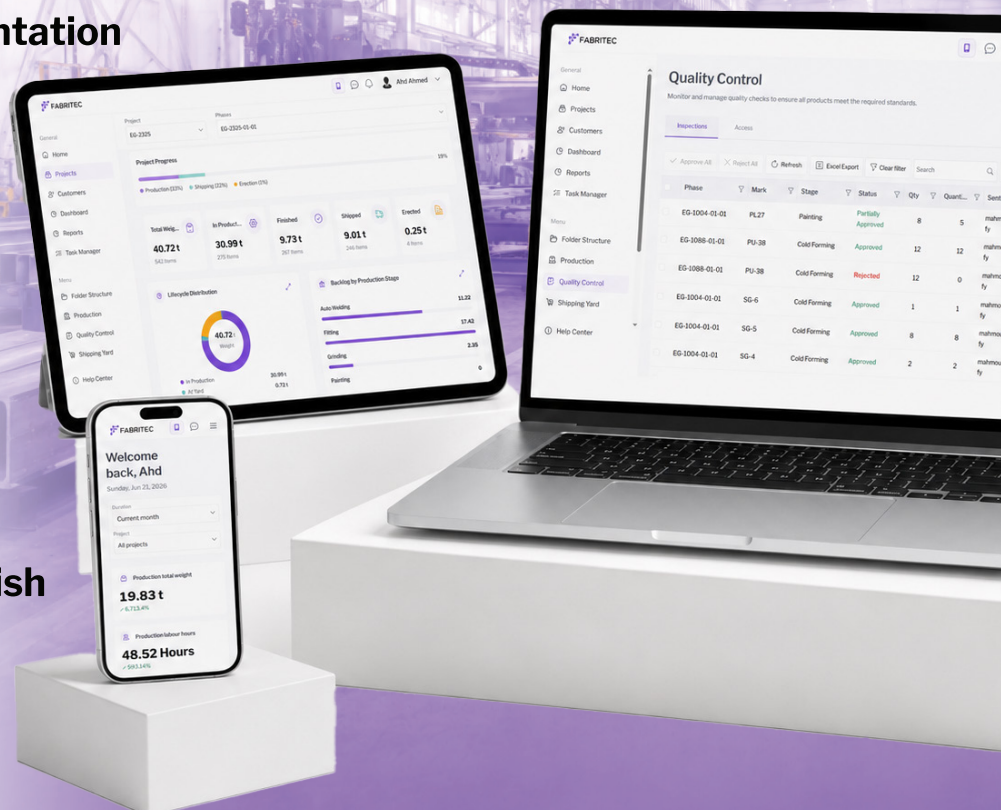

Fast implementation

Easy to use

Arabic & English support

Customer Proof Strip

Trusted by manufacturers across MENA

Egypt · Saudi Arabia · Jordan · Ghana

Mini Case Study

Jadeela Steel Industries

Saved **35%** of manual production monitoring time with Fabritec.

Ready to see where control is lost in your operation?

Book a demo with Fabritec and let us map your workflow from planning to production, shipping, and installation.
